

AMAN SHARMA

AI-Native Business Analyst · AdTech & Media · Agentic AI & RAG Applications

amansharma03feb@gmail.com | +91 8404902779 | linkedin.com/in/aman-sharma-a32577162 | Noida, India

PROFESSIONAL SUMMARY

AI-Native Business Analyst with 6+ years of experience who goes beyond documentation — building working RAG applications, agentic AI prototypes, and AI-generated UI mockups that teams iterate on directly. Hands-on across the full AI-native BA toolkit: LangGraph-orchestrated agentic workflows, RAG pipeline architecture, state management, tool access patterns, external memory design, and prompt engineering (role prompting, constraint design, few-shot, drift resolution). Domain expertise in US-market addressable TV advertising (audience targeting, ad spot pricing, forecasting) combined with deep data governance, ETL pipeline requirements, and enterprise UAT leadership across Fortune-class clients.

CORE COMPETENCIES & SKILLS

- ▶ AI-Native BA — Mockups, RAG Demos & Agentic Prototyping
- ▶ Agentic AI — State Management, Tool Access & Memory
- ▶ RAG Pipeline — Knowledge Base, Retrieval & Validation
- ▶ LangGraph — Multi-step Workflow Orchestration
- ▶ Prompt Engineering — Role, Constraints, Few-Shot, Drift Fix
- ▶ AI Output Validation & UAT for AI Solutions
- ▶ Ad Sales, Audience Targeting & Pricing Optimization
- ▶ Forecasting Models — Requirements & Business Validation
- ▶ Tableau · Power BI · Google Data Studio · MSTR
- ▶ SQL (Snowflake) — Data Validation & Anomaly Detection
- ▶ ETL Pipeline Requirements (Kafka · Airflow · AWS Lambda · S3)
- ▶ BRD · FRD · AI Mockups · User Flow Documentation
- ▶ Data Quality, Data Governance & HIPAA Compliance
- ▶ Agile · Scrum · CSPO · JIRA · Confluence

PROFESSIONAL EXPERIENCE

Senior Business / System Analyst – AI & Data Initiatives | CloudAngles | Fortune-class US Health Insurance Client *May 2024 – Present*

AI-enabled data pipelines, member MDM, HIPAA governance, and AI-native prototyping applied to operational decision review workflows.

- ▶ Applied AI-native approach to MDM decision review — hands-on with LangGraph-orchestrated agentic workflows (candidate ingestion → confidence scoring → auto-merge gate → steward review queue → audit memo generation), RAG-based operational Q&A grounded to specific source evidence rows, state management tracking each pipeline step as observable and resumable, and tool access patterns covering retrieval, confidence scoring, and PII masking layers before any external LLM call.
- ▶ Led requirements for member identity resolution (MDM) — deterministic matching (SSN fragment, DOB, member ID) and probabilistic scoring (weighted name, address, demographics) — creating a golden record across claims, eligibility, wellness, broker, rewards, and biometrics domains.
- ▶ Owned UAT and data validation — defined test scenarios, source-to-target reconciliation in Snowflake, and led RCA for 79 production data issues while maintaining client SLAs.
- ▶ Governed data quality, PHI compliance, and data dependencies across six cross-functional teams; delivered Tableau and Power BI dashboards translating pipeline metrics into leadership-level business insights.
- ▶ Recognition: Back-to-back 5-star performance ratings; two promotions within six months.

Business Analyst | Product Owner – AI Chatbot & Analytics | Algoworks, Noida*Apr 2022 – May 2024*

AI-native BA delivery — RAG pipeline, prompt engineering, AI-generated mockups, and agentic POC for SaaS and enterprise clients.

- ▶ Led BA for a GPT-4 RAG-architecture sales intelligence chatbot — designed the external memory store (Airtable knowledge base), defined data completeness standards, engineered role-based prompts with hard constraints and few-shot examples, and built a Gemini-generated Q&A validation framework; achieved 30% improvement in response accuracy.
- ▶ Applied AI-native BA approach — generated application UI mockups and user flows using Figma AI integration, enabling development teams to iterate on working visual prototypes rather than static requirement documents; compressed requirements-to-design cycle significantly.
- ▶ Diagnosed and resolved RAG pipeline failure modes — retrieval mismatches from schema gaps (geographic term mapping), prompt drift from expanding use cases; restructured prompt into priority-ordered sections (persona → hard constraints → output format) restoring consistent model behavior.
- ▶ Led POC evaluation for AI recommendation and generative chat solutions — defined feasibility criteria, tool access patterns, integration requirements, and success metrics for AI adoption decisions.
- ▶ Product Owner: 98% sprint adherence and 70% lifecycle risk reduction across AI delivery workstreams.

Business Analyst – AdTech & Addressable TV Advertising | AdCuratio Media Inc., Bangalore*Apr 2021 – Apr 2022*

US-market addressable TV SaaS — audience targeting, pricing models, ad delivery forecasting, and campaign reporting.

- ▶ Defined requirements for a multi-channel addressable TV platform — audience targeting by region and demographic, ad spot selection, network partner management (Fox, A+E Network, Univision), and creative delivery with watermarked footprint for compliance reporting.
- ▶ Contributed to an ad delivery predictor using historical run logs — defined inputs, performance benchmarks, and comparison logic; built Tableau dashboards tracking predicted vs actual delivery across spot-demographic-order parameters, used by QA to validate prediction accuracy.
- ▶ Supported ad inventory pricing model requirements (SLA and pricing by demographic, network, and spot visibility tier) and integrated Experian demographic data into the platform targeting model for geo/persona-targeted ad delivery.
- ▶ Led cross-functional team of 10; reduced reporting time by 75% through Tableau and Google Data Studio automation; executed UAT for ad delivery and reporting workflows.

Business Analyst – Digital Transformation & Credit Automation | Aavas Financiers Ltd, Jaipur*May 2019 – Mar 2021*

Credit automation, B2C mobile app, KYC compliance, and controlled rollout experimentation for a listed NBFC.

- ▶ Implemented credit automation system — 60% reduction in manual workload, 20% business growth; authored BRD, FRD, SRS; managed full UAT cycle.
- ▶ Led BA for B2C mobile loan application with Razorpay integration — 20% EMI revenue increase, 30% sales lead growth; ran a stratified controlled rollout experiment (segmented by EMI bounce history, loan size, collection visit frequency) that reduced collection officer visits by 30% and became the business case for full rural expansion.
- ▶ Automated KPI dashboards using MySQL and Excel — 60% reporting reduction; trained 200 users, reduced backlog by 80%.

EDUCATION & CERTIFICATIONS

MBA – Business Analytics | D.Y. Patil University *2023 – 2025*

B.Tech – Computer Science | Maharishi Dayanand University *2015 – 2019*

CSPO – Scrum Alliance | Agile & Scrum Fundamentals | Tableau Essential Training | Google Analytics for Beginners | Goal Setting: OKRs
